

# ALLTRACK CASUALTY HAULAGE

The Alltrack Casualty Haulage system is a lightweight and versatile 6:1 ratio haulage system designed specifically for the transference of a casualty's weight from a loaded line or ledge onto a rescuers line without the need to cut through or damage existing equipment.

Essential for all mines, tower rescue and emergency response personnel, the Alltrack system provides a safe, reliable method of rescuing personnel. This system should always be used in conjunction with a secondary back up device to provide two anchor point attachments at all times.
